Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,403,759. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference is the instant claims disclose the use of a –ONO group whereas the claims of the reference disclose the use of a –SNO group in the claimed polymer, the claimed method of delivering nitric oxide to a treatment site in a subject and in the claimed method of replacing a loss of NO groups from an O-nitrosylated polymer at a treatment in an individual.

Though they have different groups, they have the same functionality in the process. Therefore, it would have been obvious to one of ordinary skill in the art to the SNO group in the claims of the reference by ONO group in the instant claims since they have been shown to be effective in a similar system and thus would have been

expected to provide adequate results. There is no showing of unexpected results derived from said use.
